2.0 STATEMENT OF INTENT

Colortech Inc. is committed to playing a leadership role in protecting the environment. We intend to control and reduce the creation and emissions of particulate matter. We will continue to monitor our practices to reduce emissions in compliance with all Federal and Provincial regulations.

3.0 OBJECTIVES OF THE PLAN & ANY TARGETS

Colortech prides itself on technological innovation in order to produce high quality products in an environmentally responsible manner. The objectives of this plan are to assess the technical and economic feasibility of options, if any are identified, and to determine which are viable for implementation.

4.0 DESCRIPTION OF WHY THE TOXIC SUBSTANCE IS USED OR CREATED

Raw Material Receiving, Compounding, Blending, and Extrusion are the facility processes that involve the creation and emissions of particulate matter. Pigments are received in powder form and are the primary material processed at the facility to create the colour concentrate/resin products. Pigments are the main source of creating particulate matter within the facility. The facility currently utilizes dust collection systems to control the release of particulate matter into the environment.

5.0 OPTIONS TO BE IMPLEMENTED (OR STATEMENT THAT NONE ARE TO BE IMPLEMENTED)

At this time, no feasible option is available for implementation. The company will continue to work with customers and suppliers to identify alternative materials and products that meet customer specifications, and monitor technological advances that will allow it to use its raw materials more efficiently.

6.0 ESTIMATED REDUCTIONS UNDER THE OPTIONS SELECTED (IF ANY)

7.0 TIMELINES FOR ACHIEVING ESTIMATED REDUCTION (IF ANY)
