

As a responsible corporate citizen, Colortech is dedicated to the stewardship of the environment and is committed to providing products that meet or exceed customer expectations while promoting environmental responsibility. This policy has been developed to provide a framework for the setting and review of environmental objectives. Colortech will communicate this policy and our commitment to environmental protection to our employees, suppliers, and customers.

We are committed to minimizing the adverse impact of our products, packaging, and manufacturing processes on the environment through awareness, pollution prevention, waste reduction, and the use of environmentally safe products. We shall endeavor to develop innovative technologies that allow the conservation of energy and other resources to preserve the environment. We embrace the values of reuse, recover, and recycle and collaborate with our partners to strive for a goal of zero net waste through the product life cycle.

We will assess, plan, construct, and operate our facilities in compliance with applicable government regulations and legislation. Beyond or in the absence of regulatory requirements, we will apply sound management practices to advance environmental protection and minimize environmental impact.

We are dedicated to the education and training of employees to execute tasks in an environmentally responsible manner and ensure that a continuing professional development strategy aligns with our business goals.

We are committed to the continual improvement of our environmental performance through planning, implementing, and reviewing environmental objectives. We will implement plans and programs to meet established objectives, ensuring that our operations comply with this policy. In addition, Colortech participates in a periodic evaluation or audit of its progress in meeting these objectives.
